INTERIOR UPGRADE

PWI's LED reading lights provide 33,000 hours of service, so our LEDs might be the last ones your aircraft will ever need. Our LED lights are also whiter and more efficient than incandescent bulbs.

PWI LEDs operate on significantly less power and are far more cost-efficient over the life of the aircraft. PWI LED reading lights are PMA-approved in piston, turboprops, and jets. Install PWI LEDs and never think about reading lights again.
