

COIL WINDING

COIL OPTIONS:

- Custom Designs Capabilities
- Prototype to Large Quantities
- Tape Wound Toroids for Fluxgate Magnetometers
- Magnetic Cores – All Types and Sizes
- Inductors and Transformers
- Relay, Solenoid, Sensors, Chokes
- Large Power Transformers
- Aircraft Magnetics
- Varnished and Encapsulated Designs

CUSTOM WINDING SOLUTIONS

At PWI, we've provided our valued customers with design specific manufactured coils and coil assemblies since 1963. Our vast knowledge base is built on a successful track record of devising the highest quality manufacturing processes for unique coil applications. We pride ourselves on providing coil products while managing costs and staying within a prompt timeline.

From customer supplied specifications to collaborated co-engineered designs, we specialize in the fabrication of coils for a variety of applications. Everything we manufacture at PWI is built to a custom specification. We partner with our customers and provide complete support from initial design through product development and testing through the final coil shipment.

PWI can create any product you need. Let our skilled production team build your next coil wound project.
