Pilatus
PC-12 0501-0668

LED LIGHTING INTERIOR UPGRADE

Renew the PC-12 With PWI Cabin LEDs

While the PC-12 is an elegant workhorse, replacing those overhead cabin fluorescents with modern LEDs elevates the entire flying experience.

Think about it – you see and control the lighting every time you enter the aircraft. You customize it to meet your needs throughout each flight.

Upgrade your cabin lighting with PWI LEDs and feel great every time you see that refreshed modern cabin.

LED kit includes the plug-and-play LED light strips to replace the fluorescent lights; a new LED-capable dimmer controller, installation instructions and drawings as well as the FAA PMA paperwork. All PWI LED lighting is backed by a 3-year warranty.
